SHOW ROOM

Touch the products with your hand

The continuous development by our Research & Development department of Steela Abyss products, including STEELA, led to the **expansion of our showroom** of numerous final solutions for the customer over the years. **You will be able to see and touch our Steela Stainless Steel Structures, the numerous customizations available, the material and all accessories for our pools.**

CEMI PRODUCTION

Quality in details

In these years the main investment of Steela Abyss is the own production of STEELA brand products: this allows us to follow a **delicate and very important phase of steel processing**, dedicating all the attention necessary to the **precision and care of all details**.

Steela Abyss Engineering support us in the constant control in the production phases, this is the secret to keep a **high level of quality towards all our products**.

CERTIFIED

Safe

All our products, including STEELA, are **CE certified** and comply with all the latest safety regulations. We work constantly to offer the customer a product of highest quality.

ABDATABLE

Durable in time

Steela is made of STAINLESS STEEL.

This makes it a durable and guaranteed product over time thanks to the composition of the material of which it is entirely built. A guarantee not only in terms of resistance and safety but also in the adaptability of our product for any type of situation and industry, from private domestic, to large public and sports facilities.

SUSTAINABLE

Eco-friendly materials

The advantage of a stainless steel construction, in addition to the fast installation time, is also the use of a sustainable material and in full respect of the environment. Stainless Steel is indeed a **100% recyclable material, corrosion-resistant, durable and healthy**. All these properties make it perfect for today's modern buildings.

YOUR IDEAS

To design reality

Steela Abyss Engineering is always available to the customer for a **specialized consultancy with specific assistance and sport in all the design steps**. Our mission is to make your ideas come true. It will be the responsibility of Steela Abyss team to respond to the customer requests for the realization of a customized projects.
